Scholarship Winners 2021

In 2021, we awarded three scholarships:

Jennifer Elizabeth Chimbo Romero

Jennifer Chimbo Romero is a senior at Westbury High School. Kathleen Gilmore, the math teacher that Jennifer selected as the teacher who most influenced her, states in her recommendation that she “believes Jennifer has demonstrated many positive and essential qualities in my classroom as well as throughout the school community that warrant her recognition.” And in her personal essay Jennifer states, “I know that becoming a math and bilingual teacher as well will bring me joy. I want to be able to help Spanish speaking students find their passion for math.”

Allison Isabel Olazabal

Allison Olazabal attends Oceanside High School. In her senior year she is taking AP Calculus BC. The teacher she feels influenced her most is Yves Jean-Pierre who wrote that, “I have seen many examples of her talent and have long been impressed by her diligence and work ethic”. In her personal essay, she articulates that, “Mathematics is a boundless numerical story that challenges the minds of every student through its logical complexities and expansive content; however, students like myself have been continuously engaged by such a story”.

Michael Anthony Sheehan

As a senior at West Hempstead High School, Michael Sheehan is studying both AP Calculus AB and AP Statistics. Michael has selected Cathieann Rowland as the teacher who has most influenced him and she reports that, “Michael easily falls into the top 5% of students in terms of mathematical ability and achievement I have taught in my 23 years of teaching”. Michael states in his personal essay that, “For as long as I remember, I’ve loved mathematics. Not just for the challenge it always promises, but also for its elegance”.
